

DAP® Spec Line products are designed specifically to meet the industry specs for the kind of work you do.

Wausau Supply Company stocks all of the caulks and adhesives recommended for the proper installation of Waudena Millwork entry door systems.

MEET THE LINE THAT MEETS THE SPECS

DRAFTSTOP® 812

- A low pressure polyurethane foam designed to fill gaps between fenestration products and rough openings
- Store and reuse the same can for up to 30 days
- Available in 16 oz. Stop N' Store™ or 26 oz. gun grade to use with an applicator gun

DYNAFLEX® 800

- A premium polymer sealant that's the recommended adhesive for the bed of caulk under your door's sill
- Waudena Millwork & DAP recommend at least three 1/4" beads that run the entire length of your sill for a watertight seal

DYNAFLEX® 920

- A high performance, elastomeric sealant that helps prevent water and air intrusion
- Meets or exceeds the ASTM C920 spec and is the recommended sealant between the door and siding
- Can be applied in most weather conditions
- Available in colors to match the standard clad colors for Waudena Millwork's exterior door and Titan™ clad kits; with many additional colors available
